

2001-2002 Ford F-Series Truck Colour Range

We are starting to see a number of these new trucks being available now in Australia. They are causing a few problems, they are manufactured in Brazil but when they are imported into the country, Ford Australia re-name and re-code all of the colours available on these vehicles. The table below outlines some of the original Brazilian colour names compared to the new Ford information. Please note, currently most of these colours will be listed in our system under the original Ford Brazil info.
