

Standex Technical Training

STANDEX

DuPont Performance Coatings (DPC) has a modern and fully equipped training centre located at its Sydney head office at Riverstone, it provides the highest standards in training and education expected of one of the world's leading suppliers of refinish products.

The Regional Training Centre provides excellent facilities for students to learn in a modern, comfortable and well equipped environment. Both theoretical seminars and practical workshops are catered for in the centre which is equipped with a conference room, fully extracted spray booth and a state of the art colour mixing room.

The centre is a visible example of the company's commitment to the refinish industry and to the provision of first class training programs for both bodyshop staff and management.

Courses held at the Regional Training Centre, and at the interstate training centre locations, cover a wide range of disciplines from basic workshop skills and colouristic courses through to advanced programs including high solids and waterborne theory and application.

Overviews of the courses on offer are included in this pack.

All participants receive, as part of the training experience, an exclusive Training Kit valued at over \$60.00. Kits contain Standox anti static spray suit, gloves, Standox TShirt and cap. Course charges also include meals and refreshments.

Courses are prepared and co-ordinated by personnel with vast experience in our products and procedures. Refinish paint technology now and in the future will require the use of high performance products, and the need for training is not just important, it is essential for the success of any Bodyshop.

For more information on the centre and course schedules please call Standox on (02) 8818 4376.

ADDITIONAL COURSES

If minimum numbers are met additional courses can be arranged on request. Ask your Standox Representative for more information.

Standex Refinishing 1 (2 Days)

Why Attend?

Standex Refinishing Part 1 has been designed for the vehicle refinisher who has recently started using Standox. Standox Part 1 covers existing and new products and procedures. The emphasis is on product strategy and application of the product range. On course completion, the vehicle refinisher should have gained new skills and confidence with the Standox range. This will enable them to become more of an asset to the paint shop.

Who Should Attend?

Standex painters who wish to broaden their Standox product & procedure knowledge.
Experienced painters who have not used Standox products.
TAFE teachers & students who want to increase their 2K product knowledge.

What will I learn?

- OH&S in the workplace & environment
- We are Standox
- The Standox product range and strategy
- Standox new products & procedures
- Substrate preparation and priming
- Sanding techniques & equipment
- Polishing techniques
- Spray gun defects
- Practical Program

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standox Representative for more information.

Standex Refinishing 2 (2 Days)

Why attend?

Standex Refinishing Part 2 is the second part of the Standex training programs. On course completion, the painter will have obtained all the necessary skills and knowledge of the Standex product range. These skills will assist in being able to be more productive in the bodyshop and overcome any obstacles that may arise.

Who Should Attend?

Those painters who have previously completed Standex R1.
Existing Standex painters wanting to gain further knowledge on products and procedures.

What will I learn?

- OH&S in the workplace & environment
- Warranty - Quality & Restoration process
- VOC High Pro Clear & HS Clear
- Three Layer Xirallic application
- Three Layer Xirallic repair and blend process
- HS Primer & HS Clear
- Infra-red procedures

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standex Representative for more information.

Standox Painting Plastics (1 Day)

Why attend?

Standox Plastic Painting Seminar has been designed for the existing Standox vehicle refinisher or one who has recently started using Standox. In this module, the participant of the training course learns how to pretreat and coat plastic materials. It describes how to refinish the most commonly used plastic substrates in practice, taking into consideration the different coating requirements. Standox Plastic Painting Seminar covers existing and new products and procedures. The emphasis is on product strategy and application of the plastic product range. On course completion, the vehicle refinisher should have gained new skills and confidence with the Standox Plastic range. This will enable him to become more productive in the painting of plastic parts in the paintshop.

Who Should Attend

New & Existing Standox vehicle refinishers wishing to broaden their knowledge on the Standox Plastic Painting System.

What will I learn?

- OH&S in the workshop & environment
- Plastic Preparation
- Standox Plastic Products
- Plastic Practical - Repair of damaged bumper bar (deep scratch)
- Plastic Practical - Refinishing of new bumper bar

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standox Representative for more information.

Standex Colouristic Seminar (1 Day)

Why attend?

Standex Colouristic Seminar has been designed to help the Standox vehicle refinisher achieve the best results when colour matching. From the perception of colors, to the basic rules of colorimetry and the correct color rectification. This module provides the necessary technical know-how on the theory and practice of tinting and explains the tools that can be used to achieve reliable results. An informative theory and practical session showing how to get the results when using Standox Colour Spectrophotometer.

Who Should Attend?

Standex vehicle refinishers wanting to increase their colour skills.
Existing vehicle refinishers with colour matching concerns.

What will I learn?

- OH&S in the workplace & environment
- Standox Tinter Characteristic
- Standox Colour Tools
- Standox Colour Information
- Blending – as part of colour matching
- Colour Spectrophotometer theory and practical

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standox Representative for more information.

Standex Basecoat & Clearcoat Application (1 Day)

Why attend?

The Standox Basecoat & Clearcoat Application Seminar has been designed to help the refinisher achieve the best results when using the Standox Basecoat & Clearcoat system. This course will enable the refinisher to better understand the Standox Basecoat & Clearcoat system, therefore enabling the refinisher to become more productive in the paintshop. The emphasis is on the correct application of the Basecoat & Clearcoat product range.

Who Should Attend?

Refinishers who wish to broaden their product knowledge and application skills. New Standox refinishers wanting to increase their technical and application skills and existing refinishers with application concerns.

What will I learn?

- OH&S in the workplace & environment
- Theory – Overview of Standox Basecoat & Clearcoat systems and their uses
- Practical – Application of Standox Basecoats & Clearcoats

Course Bookings

Please complete the enclosed Training Registration Form and fax to secure your place.

Standex Micro Repairs (1 Day)

Why attend?

The Standex refinishing course has been designed to help the bodyshop meet the demand for economical repairs. This course, theory and practical, describes how to repair minor damage such as stone chips and scratches.

Who Should Attend?

Standex painters who wish to broaden their Standex product and application knowledge.
New Standex vehicle refinishers wanting to increase their technical and application skills.

What will I learn?

- Theory – When and where micro repairs should be used
- Theory – Suitable products for micro repair application
- Practical – Application and Blending techniques

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standex Representative for more information.

Standex Rapid Repair System (1 Day)

Why attend?

This Standox course has been specifically designed to further enhance the overall speed of a repair process when using Standox products. The emphasis is on productivity gains and paint material savings therefore enabling the paintshop to be more profitable. This course will enable the refinisher to make the correct choice of Standox products that can save time and money. Advanced training in the application of Standox Wet on Wet Surfacer, VOC-compliant 2K HS Clears and 2K MS Clears.

Who Should Attend?

Standex refinishers who wish to broaden their product & application knowledge. New Standox vehicle refinishers wanting to increase their technical & application skills.

What will I learn?

- OH&S in the workshop & environment
- Theory on Standox Wet on Wet Products
- Theory on Standox Basecoat System and their uses
- Theory on Standox MS & HS VOC Clearcoats
- Theory on how the correct choice of Hardener & Thinner improves drying times & appearance
- Choosing the correct spray gun set up
- Practical application of Standox wet on wet surfacers
- Practical application of Standox Basecoats
- Practical application of Standox MS & VOC compliant HS Clearcoats

Course Bookings

No scheduled courses for 2nd half of 2010, if minimum numbers are met this course can be arranged on request. Ask your Standox Representative for more information.

Standex New Technology (1 Day)

Why attend?

This Standox course has been specifically designed as an introduction to new efficient use and innovative paint technology from Standox. New demands such as faster application, protection of the environment, new colour effects and material savings are the driving factors for the development of new paint technologies. Introduction to Waterborne Technology as the refinish paint of the future. The emphasis is on productivity gains and paint material savings therefore enabling the paintshop to be more profitable.

Who Should Attend?

Standex refinishers who wish to broaden their product & application knowledge. Standox vehicle refinishers wanting to increase their technical & application skills.

What will I learn?

- OH&S in the workshop & environment
- Theory on Standox Waterborne basecoat system
- Theory on Standox VOC compliant clearcoats
- Theory on Standox VOC compliant 2K system
- Practical application of Standox Waterborne Basecoat
- Practical application of Standox VOC clearcoat
- Practical application of Standox VOC 2K system

Course Bookings
