The Art of Refinishing.

Standocryl VOC Topcoat

Latest European 2K innovation gives a prestige finish in less time.

Introducing Standocryl VOC Topcoat, the very latest in 2K innovation from Europe.

Standocryl VOC Topcoat is perfectly suited for the efficient and environmentally friendly refinishing of solid-color vehicles, a segment of the market which puts a premium on efficiency and low costs.

Even so, your customers still expect a perfect result. And Standocryl VOC Topcoat delivers just that.

Based on new pigment and resin technology, the Standocryl VOC Topcoat system is based on only 23 mixing bases. Colors and formulations can be identified using the Standox Colorbox, Standowin and Acquire Spectrophotometer.

The excellent efficiency of this Standocryl VOC 2K Topcoat system becomes obvious during application:

Can be applied easily:

- Just mix 3:1 with VOC hardeners, add 15% thinner and start spraying.
- One pass is all it takes.
- No interim flash off required.
- Covers in 1.5 coats.
- 15–30 minutes drying time.
- Available for matting and plasticising.

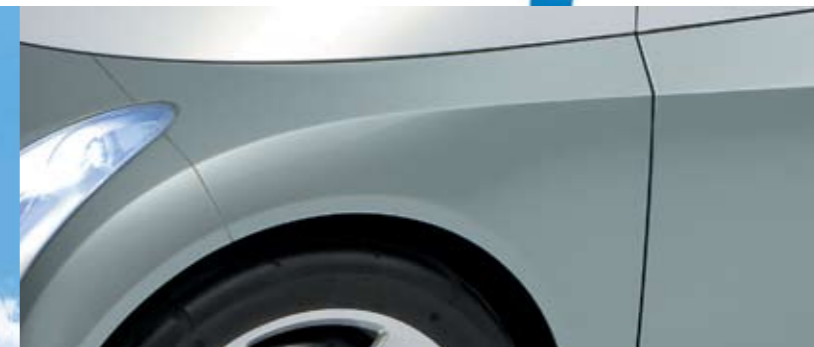

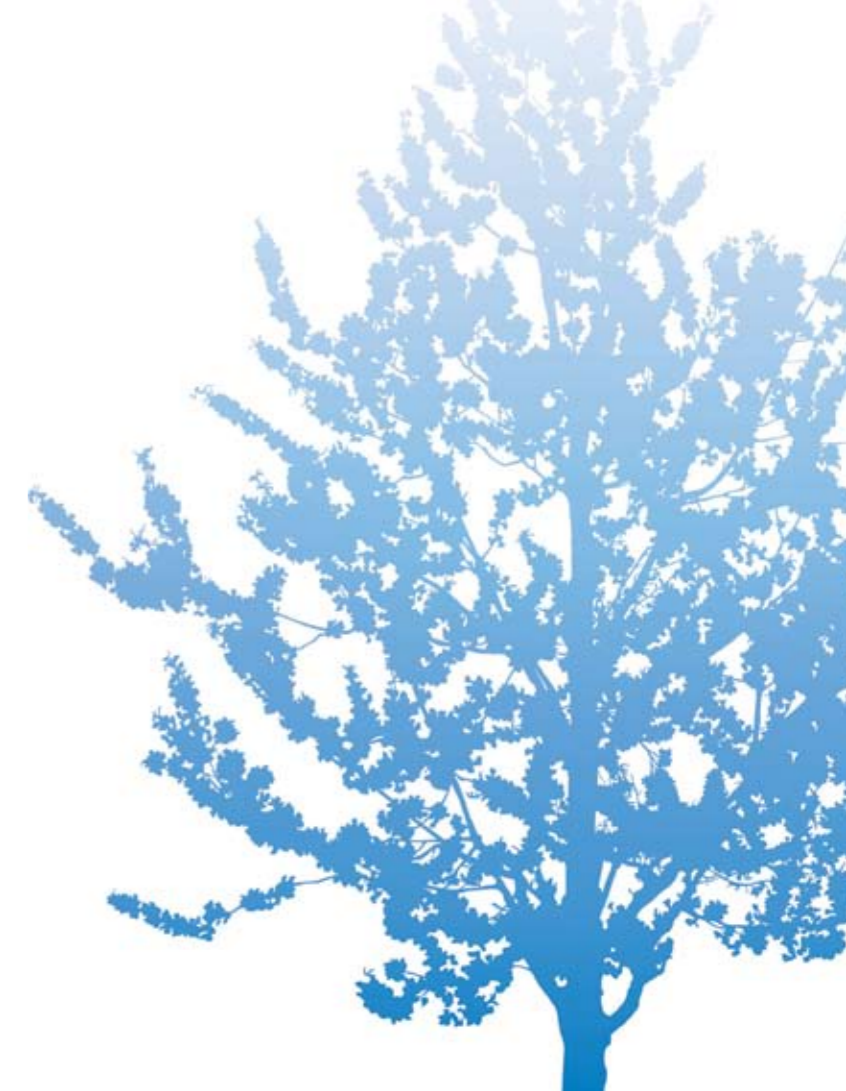

You will soon be convinced of the user friendly and efficiency of Standocryl VOC Topcoat. The good hold-out – even on vertical panels – helps avoid flaws and time-consuming re-work while the excellent viscosity provides for perfect gloss.

Needless to say, Standocryl VOC Topcoat is easy to polish, giving you an exceptional finish that you've come to expect from Standox.

Standocryl VOC Topcoat has excellent product properties that make it the ideal choice for all kinds of refinishing jobs involving solid color colors.

Standocryl VOC Topcoat is an innovative and user-friendly paint system for Micro-Repair, panel repair or overall resprays that meets all the requirements of modern bodyshops.

Highlights of Standocryl VOC Topcoat

- User-friendly application in only one working pass.
- Very good spraying properties.
- Good vertical hold-out.
- Good flow and high gloss.
- Very good opacity.
- Matting and plasticising with proven additives.
- Short drying times.
- Easy to polish with outstanding final appearance.
- VOC compliant.
- High efficiency in all aspects of the refinishing process.

Standocryl VOC Topcoat saves precious working time. Faster throughput means your shop is quickly available for the next job.
